MY PROFILE

Passionate Systems Engineering student focused on full-stack web and mobile development. Through academic projects, I have developed logical thinking and problem-solving skills, allowing me to approach challenges efficiently and build scalable software solutions. I am recognized for clear communication, teamwork, and the ability to quickly adapt to and learn new technologies, dedicated to solving complex technical challenges through continuous learning.

EXPERIENCE

ACADEMIC PROJECTS – SYSTEMS ENGINEERING

University of EAFIT

- Participated in multiple academic projects focused on software development, problem-solving, and logical reasoning.
- Worked on a project in collaboration with Magneto, developing an AI-based interview training agent, focused on structured logic, analysis, and iterative improvement.
- Developed a web application for a pastry business (Soufflé), designed to support course search and purchase functionalities, working collaboratively in a team environment.
- Completed several mini-projects using Java and database systems, strengthening skills in logical thinking, data organization, and structured problem-solving.
- codeAcademy (E-commerce Platform): Developing a digital course and ebook platform for tech education. Built a robust backend with Django and PostgreSQL, containerized with Docker, and integrated AI features to optimize workflows and personalize user experiences.
- medEats (Mobile App): Building a React Native application tailored for Medellin's foodie community. Engineered a hybrid platform that combines fast restaurant recommendations with a social network experience, powered by a Django and PostgreSQL backend.

EDUCATION

SYSTEM ENGINEERING AT UNIVERSIDAD EAFIT

COURSE: ARTIFICIAL INTELLIGENCE

COURSE: FUNDAMENTALS OF WEB DEVELOPMENT

SOFTWARE ENGINEERING RESEARCH GROUP (SEMILLERO)

COURSE: DEVELOPMENT WITH IA
